### DETAILED ACTION

1. This application is a 371 of PCT/EP04/01370.

Claims 1-28 are pending.

2. *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 8-9, drawn to clopidogrel besylate contains toluene. If this group is elected, claims 1-7, 14-18 reading on the elected compound can be prosecuted together with the election.

Group II, claims 10-11, drawn to clopedogrel besylate contains dioxane. If this group is elected, claims 1-7, 14-18 reading on the elected compound can be prosecuted together with the election.

Group III, claims 12-13, drawn to clopidogrel tosylate. If this group is elected, claims 1-7, 14-18 reading on the elected compound can be prosecuted together with the election.

Group IV, claims 1-7, 14-18, drawn to remaining salt not encompassed by groups I-III. If this group is elected, a further election of a single disclosed species is also required. Further restriction may be required.

Group V, claims 19-28, drawn to multiple component particulate containing active ingredient and solid absorbent. If this group is elected, a further election of a single disclosed active ingredient and a single disclosed solid absorbent is also required. Further restriction based on the election may be required.

The inventions are independent or distinct, each from the other because:

Group I-IV are drawn to patentably distinct and independent products each is an independent chemical identity which must be searched separately not co-extensive. A reference anticipate clopidogrel sulfonate would not render a clopidogrel besylate toluene solvate obvious since it is well recognized in the chemical art each solvate/hydrate is a different chemical identity given separate name and registry number, for example paroxetine hydrochloride, RN....., paroxetine hydrochloride hemihydrate RN..... A search of one compound would not cover the other and vice versa. Therefore, enormous search must be conducted for each individual product and without restriction, it would be a great burden to the office.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to

Art Unit: 1625

petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
